

Viewing your Water Hero Device

1. Using your smartphone or computer, go to <https://mywaterhero.net>, or open your iOS App
2. Use the e-mail address and password you created to log into your account. You should now see your device.
3. Click on your Device Name to access the Dashboard
4. Congratulations! You are now ready to plumb the device into your water system and protect your building from costly & damaging leaks with Water Hero!

Example Water Hero P-100 Plumbing

Refer to page 10-11 of the Manual for more details about plumbing installation

Thank you for your purchase!

QUICKSTART GUIDE

Set Up Your Water Hero

1. Place Water Hero near location it will be plumbed
2. Screw round white Sensor Cap to top of brass meter
3. Connect blue Sensor Cable to jacks on round white Sensor Cap and Main Controller
4. Connect Valve Power Cord to Main Controller
5. Water Hero Main Controller will power up; a blinking green LED and solid yellow LED will illuminate

Connect to Your WiFi Network

Option #1: Using an iPad or iPhone

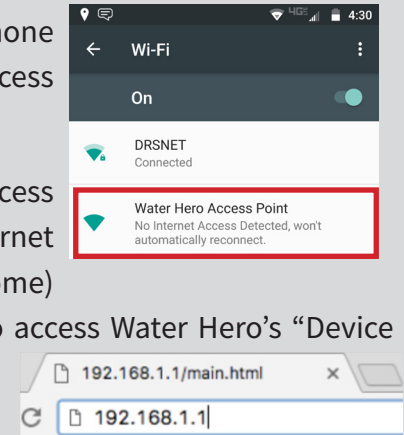

1. Search the Apple App Store for “Water Hero Remote” and download
2. Open the app and tap the text that reads “New Customer? Tap here to create an account”
3. Enter your e-mail address & password; tap the green tab
Note: This e-mail is where you’ll receive leak e-mail alerts
4. You’ll be directed to the “My Devices” page; on the bottom right tap “+”
5. Follow Step 1 instructions, and tap “Next” at the bottom of the page, then continue through Step 4

Option #2: Using any smartphone or computer

1. Go to <https://mywaterhero.net> and select “Create an account.”
Enter your e-mail address and create a password

Note: This e-mail is where you’ll receive leak e-mail alerts

2. Go to WiFi settings on your smartphone or computer; select “Water Hero Access Point” as your WiFi network
3. Once connected to “Water Hero Access Point” WiFi network, open an Internet browser (we recommend Chrome) and go to URL <http://192.168.1.1> to access Water Hero’s “Device Configuration Page”

4. Using Discovered Networks dropdown menu, select the WiFi network that you’d like to connect your Water Hero with
Note: Do NOT enter anything under Manual Input or Security type unless directed by a Water Hero technician
5. Enter password for your selected WiFi network (case sensitive)
6. In e-mail field, enter same e-mail address that you used to create your account
7. Click “Add” and a *thank you* dialog box should appear; click OK and your Water Hero device should reboot
8. When finished, green LED on Water Hero will blink rapidly while connecting to your network. Once connected, Green LED will begin slowly blinking
