QUICKSTART GUIDE

Set Up Your Water Hero

1. Attach round white Sensor Cap to top of brass meter
2. Connect blue Sensor Cable coming from Sensor Cap to jack on Main Controller
3. Connect Valve Power Cord to Main Controller (Note: P310 units will also have a black power cord that plugs into a wall outlet)
4. Connect Power Adapter to a wall outlet and plug the cable's barrel jack connector into Main Controller
5. The Water Hero Main Controller will power up; a blinking green LED and solid yellow LED will illuminate

Connect to Your WiFi Network

Using any smartphone or computer

1. Go to <https://mywaterhero.net> and select "Create an account." Enter your e-mail address and create a password

Note: This e-mail is where you'll receive leak e-mail alerts and warnings

2. Go to WiFi settings on your smartphone or computer. Select "Water Hero Access AP (XXXX)"* as your WiFi network (3733 is used in this example)

* (XXXX is the last 4 digits of your device serial number)

3. Once connected to the "Water Hero AP (XXXX)" WiFi network, open an Internet browser (we recommend **Chrome**) and go to <http://1.2.3.4> to access Water Hero's "Device Configuration Page"

Device Configuration

Connect Device to Water Hero Account

Enter your Water Hero account email address, if you do not have an account, visit mywaterhero.net to sign up

Email Address:

Network Setup

Automatic (preferred)

Manual (advanced)

Please select your Network Name from the list below, enter your password and click Add.

Network Name

Select Network

Enter Network Password

Show Password

Add

Diagnostics

4. In the Email Address field, enter the same email address that you used to create your account
5. Using the Network Name dropdown menu, select the WiFi network that you'd like to use for your Water Hero

Note: The Manual Network Setup is only needed in a few situations. If you need to manually enter Network information, please contact Water Hero Support

6. Next enter the password for your selected WiFi network (passwords are case sensitive)
7. Click "Add" and a confirmation dialog box should appear; click OK and your Water Hero device will reboot

1.2.3.4 says

Water Hero Device:

Credentials Accepted. Close this dialog and wait for the slow-blinking green LED to indicate a valid connection to the WiFi network.

OK

8. After rebooting, the green LED on Water Hero will blink rapidly while connecting to your network. Once connected, the Green LED will begin to slowly blink
