

# Whole Home Leak Protection with Automatic Water Shut Off

**Water Hero**<sup>®</sup>  
Conserve. Protect. Save.

- **Remote & Auto Water Shut Off** - Remote and automatic water shut off protects your home from significant leak damage via our automatic water shutoff valve.
- **Access To Water Use Data** - See real time and historical water data to easily diagnose leaks and save hundreds on your water bill.
- **Text & E-mail Alerts** - Alerts directly to your phone when you surpass the thresholds that you set, leading to a water leak.
- **User Configurable** - All settings and thresholds are easily adjusted over the web so that you can easily protect your home.
- **Accessible worldwide** - Web Based platform easily accessed from any browser on a desktop, laptop or smart phone anywhere in the world.
- **Temperature Sensor Monitoring & Alerts** - Protect from temperatures that could lead to a burst pipe from freezing with text/email alerts.
- **Whole Home System** - Our water monitoring system will keep track of flow to protect your entire home; sensors only protect the locations where they are placed from leaks.
- **Total User Controlled** - Leak alerts and our automatic water shut off are user configurable to minimize false positives and provide the best level of protection.
- **Reliable components** - Brass utility grade plumbing components, which we make "smart" with our electronics. Modular design makes for optimal field serviceability.
- **Easy Installation** - Installation by a licensed plumber typically takes one hour or less.
- **Battery Back Up** - Use the battery and local processing to protect your home when it's most vulnerable – during a power outage.
